

HP Color LaserJet Enterprise CP4020-CP4520 Series Printer

Change jam recovery

This product provides a jam recovery feature that reprints jammed pages.

1. Press the **Home** button .

2. Press the down arrow ▼ to highlight the **CONFIGURE DEVICE** menu, and then press the **OK** button.
3. Press the down arrow ▼ to highlight the **SYSTEM SETUP** menu, and then press the **OK** button.
4. Press the down arrow ▼ to highlight the **JAM RECOVERY** menu, and then press the **OK** button.
5. Press the down arrow or up arrow ▼/▲ to highlight the appropriate setting, and then press the **OK** button. The following options are available:

- **AUTO** — The product attempts to reprint jammed pages when sufficient memory is available. This is the default setting.
- **OFF** — The product does not attempt to reprint jammed pages. Because no memory is used to store the most recent pages, performance is optimal.

NOTE: When using this option, if the product runs out of paper and the job is being printed on both sides, some pages can be lost.

- **ON** — The product always reprints jammed pages. Additional memory is allocated to store the last few pages printed. This might cause overall performance to suffer.

6. Press the **Home** button  to return to the **Ready** state.
