

LASERJET PRO 400 MFP M425 SERIES

Cancel a print job (Mac OS X)

1. If the print job is currently printing, cancel it by pressing the Cancel **X** button on the product control panel.

NOTE: Pressing the Cancel **X** button clears the job that the product is currently processing. If more than one print job is waiting, pressing the Cancel **X** button clears the print job that currently appears on the product control panel.

2. You can also cancel a print job from a software program or a print queue.
 - **Software program:** Typically, a dialog box appears briefly on the computer screen, allowing you to cancel the print job.
 - **Mac print queue:** Open the print queue by double-clicking the product icon in the dock. Highlight the print job, and then click **Delete**.
