

HP LaserJet Enterprise flow MFP M525

Cancel a print job (Mac OS X)

 **NOTE:** If the print job is too far into the printing process, you might not have the option to cancel it.

1. If the print job is currently printing, cancel it from the product control panel by following this procedure:
 - a. From the Home screen on the product control panel, touch the Stop  button. The product pauses the job, and the [Job Status](#) screen opens.
 - b. From the list on the touchscreen, touch the print job you want to cancel, and then touch the [Cancel Job](#) button.
 - c. The product prompts you to confirm the cancellation. Touch the [Yes](#) button.
2. You can also cancel a print job from a software program or a print queue.
 - **Software program:** Typically, a dialog box appears briefly on the computer screen, allowing you to cancel the print job.
 - **Mac print queue:** Open the print queue by double-clicking the product icon in the dock. Highlight the print job, and then click **Delete**.
