

# HP LaserJet Enterprise MFP M725

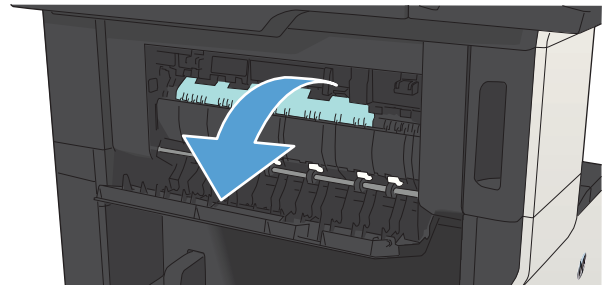

## Clear jams in the stapler/stacker

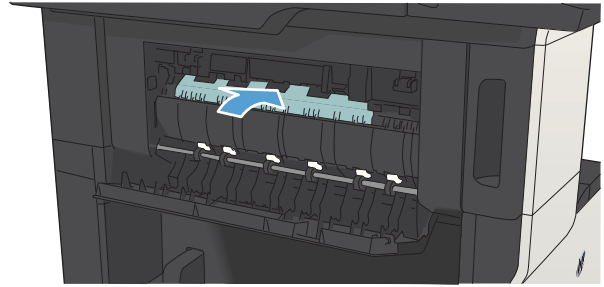

1. If paper is visible in the stapler/stacker output bin, grasp the leading edge of the paper and slowly pull the paper out of the product.

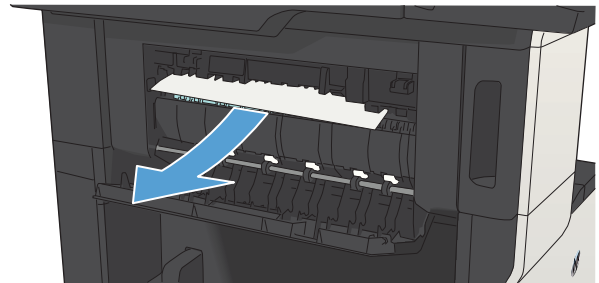

2. Open the upper-left door.

3. Press the green tab down to open the bar.

4. Grasp both sides of the paper, and slowly pull the paper out of the product.

5. Close the upper-left door door. Make sure that both sides of the door snap into place.
