M750 Series Printer

Change jam recovery

This product provides a jam recovery feature that reprints jammed pages.

1. Press the Home button ⌂.

2. Press the down arrow ▼ to highlight the **Administration** menu, and then press the OK button.

3. Press the down arrow ▼ to highlight the **General Settings** menu, and then press the OK button.

4. Press the down arrow ▼ to highlight the **Jam Recovery** menu, and then press the OK button.

5. Press the down arrow ▼ or up arrow ▲ to highlight the appropriate setting, and then press the OK button. The following options are available:

   - **Auto** — The product attempts to reprint jammed pages when sufficient memory is available. This is the default setting.

   - **Off** — The product does not attempt to reprint jammed pages. Because no memory is used to store the most recent pages, performance is optimal.

     CAUTION: When using this option, if the product runs out of paper and the job is being printed on both sides, some pages can be lost.

   - **On** — The product always reprints jammed pages. Additional memory is allocated to store the last few pages printed. This might cause overall performance to suffer.

6. Press the Home button ⌂ to return to the **Ready** state.
